

## Terms of Use for the KILT Stakeboard Web Application

### What is the KILT Stakeboard?

KILT Stakeboard allows you to manage your staking on the KILT Blockchain.

Therefore, you can

- see how many stakeable KILT Coins you have in each of your identities or addresses
- display how many you have staked with each of your identities or addresses
- display which collator you back, with which identity or address
- display how many KILT Coins you can still stake
- prepare a transaction to stake or to increase or decrease your staking amount
- have the transaction you would need for your changed staking amount calculated
- transfer this prepared transaction to your wallet for signature to be processed by the KILT Blockchain.

Also, the Stakeboard reads from the KILT blockchain or third-party applications and shows you

- the stakes for each collator
- stake of respective collator + delegators staked on them
- ranking of the collators
- which collator is/isn't actively creating blocks.

The data generated in and for your staking activities is stored locally on your device. The balances displayed are based on the information currently stored on the KILT blockchain.

Access to the KILT Stakeboard is made through your wallet and all transactions prepared in the KILT Stakeboard will need to be signed via the wallet through which the KILT Coins are accessed.

Any rewards received for your staking will automatically go to the same identity or address where your stake comes from.

### **NOTE: Professional crypto staker**

The Stakeboard is aimed exclusively at professional crypto stakers (entrepreneurs in the sense of § 14 BGB/ German Civil Code) who have familiarised themselves sufficiently with staking and the resulting rewards, as well as the prerequisites and calculation of these rewards in the KILT ecosystem, so that they fully understand the impact their actions on the Stakeboard can have.

By using the Stakeboard, you declare that you are a professional crypto staker, i.e. to act as entrepreneur and not in your capacity as a Consumer. Entrepreneur is any natural person or legal entity who, when using the Stakeboard, acts in exercise of its commercial or self-employed professional activity.

## Staking, Investment, Legal or Tax Advice

Nothing published by the B.T.E. BOTLabs Trusted Entity GmbH should be interpreted as staking or investment advice. B.T.E. BOTLabs Trusted Entity GmbH is in no way providing trading, staking or investment advice. Please consult with your appropriate licensed professional before making any financial transactions, including any investments related to ideas or opinions expressed, past, present, or future by the aforementioned entity and any existing or future entities that may operate under the parent entities. B.T.E. BOTLabs Trusted Entity GmbH does not intend to express financial, legal, tax, or any other advice and any conclusions drawn from statements made by, or on, B.T.E. BOTLabs Trusted Entity GmbH shall not be deemed to constitute advice in any jurisdiction. Information is provided for practical, educational and amusement purposes only.

## Liability

B.T.E. BOTLabs Trusted Entity GmbH (hereinafter referred to as „BTE“) is liable for damages that are based on an intentional or grossly negligent breach of duty by BTE, its legal representatives or various agents.

In the event of a breach of essential contractual duties, BTE shall only be liable for the contractually typical, foreseeable damage if this was simply caused by negligence. Significant contractual obligations are those whose fulfilment enables the proper execution of the contract in the first place and whose compliance you can regularly rely on.

The limitation of the two preceding paragraphs also apply to the legal representatives and various agents of BTE, if claims are asserted directly against them. The liability limitations resulting from the two preceding paragraphs do not apply insofar as BTE fraudulently concealed the defect or assumed a guarantee for the quality of KILT Stakeboard.

Liability for culpable injury to life, limb and health and liability under Product Liability Act remain unaffected.

Any additional claims for damages are excluded.

## Risk information

The following risk information contains a list of risks associated with the use of KILT Stakeboard. The list is not exhaustive. It is not excluded that further unknown or unpredictable risks exist.

KILT Stakeboard is used on your system as a web application and to prepare transactions to be signed with your wallet. For the security of your wallet, it is essential that your system is not compromised with malware. Please make sure that this is the case, because malware running unnoticed in the background, for example a key tracker, represents a major security risk for you.

KILT Stakeboard communicates with the KILT Blockchain and depends on its functionality. Errors, dysfunctions, including failure of KILT Blockchain or the technical ecosystem in which it lives may adversely affect the KILT Stakeboard or the information available there.

KILT Stakeboard and in particular the underlying software application may be the subject of hacking or other malicious interference by unauthorised third parties resulting in the loss, theft or other violation of data.

Should you want to use the KILT Stakeboard in the version tested and finalised by us, always make sure to use it via [stakeboard.kilt.io](https://stakeboard.kilt.io). Otherwise, there is a risk that a third party may unconsciously or knowingly incorporate errors leading to potential adverse consequences for the usability and functionality of their copy or amended version of the KILT Stakeboard not controlled by us anymore.

To be absolutely sure that the transaction is correct and reflects what you wanted, always check the information and data in your wallet before signing the transaction.

Communication via internet-based systems is fundamentally susceptible to data/information being read and possibly even changed. We have no influence on which processes (now and in the future) run in the background of the web browser used.
